Re: EOR/CCP Administrative Change for Engineering
Refinement to Prudhoe Bay Unit's PSD Permits.

Dear Mr. Johnston:

Under separate cover you will receive three copies of the proposed administration change to current Prudhoe Bay Unit Prevention of Significant Deterioration permits. This change will allow a modification to the source inventory to accommodate additional heater and turbines to be constructed near the Central Compressor Plant.

Based upon the meeting November 22, between my staff and yourself, it is our understanding that the modifications to the current permits is an administrative change, and therefore, we request a response from your offices in order to meet our scheduling requirements by February 1, 1984. If you have any questions, please call Al Schuyler.
